

Executive Summary

Software Engineer with a previous career in corporate law. Currently managing Azure and AWS environments and developing enterprise automations and applications. Strong foundation in Go, Kubernetes, Python and site reliability. I'm a highly driven individual, motivated by improving efficiency.

Professional Experience

Dublin Rape Crisis Centre – Software Engineer (June 2025 – present)

- Manage AWS and Azure environments, including tenant configuration and CI/CD pipelines.
- Built a desk booking application and deployed this on a Kubernetes cluster. Used AI tools such as Cursor and Gemini for code generation to speed up development.
- Developed custom Go scripts to automate the extraction and formatting of clinical notes from our CRM, which were required for the Director of Public Prosecutions.
- Maintain CI/CD pipelines that run on Jenkins and upgrade our Jenkins instance regularly.
- Engineered YAML-based CI/CD pipelines that run in Azure; managed secure secrets and API credentials via Azure Key Vault.
- Created a staging environment using terraform to improve reliability of the system. When I joined the team there was only a dev and prod environment.
- Set up dashboards and alerts for critical services using Grafana and Prometheus.
- Integrated Splink (Stripe wrapper) via Azure to manage secure payment processing and automate donor journey routing based on transaction data.
- Coordinated with external cybersecurity teams for pen testing and reviewing vulnerability dashboards. Subsequently addressed these vulnerabilities.
- Managed technical and data requirements for a government audit (CUAN).
- Set up and currently manage an internal IT ticketing system for day-to-day troubleshooting and technical support.
- Managed the IT infrastructure setup for an office relocation.

Education

Maynooth University (2024 -2025)

Higher Diploma in Software Development (1:1)

Modules: Object Oriented Programming, Databases, Data Structures & Algorithms, Software Testing, Mobile Application Development, Structured Programming, Web Information Processing, Software Project.

University College Dublin (2010-2014)

Law (BCL) (2:1)

Computing Skills

Cloud & DevOps:

AWS (Lambda, API Gateway etc.), Azure, Bash, Kubernetes, Istio, Helm, Docker, GitHub Actions, CI/CD, Jenkins, Terraform

Languages/Tools:

Go, Python, Java, Bash, Git, Power Platform, JavaScript

Databases:

SQL, MongoDB, Dataverse, PostgreSQL, Firebase

Web Development:

React, Node.js, HTML, CSS, Firebase, Expo, Express.js, Bootstrap, Vite, REST APIs, GraphQL

Testing:

Unit Testing, Manual Testing, Software QA principles

Projects

AWS Portfolio Site:

Deployed a personal website on AWS using CloudFront and S3 with domain setup via Route 53, using Bootstrap for the frontend.

Golf App Tracker:

Mobile application built with React Native (Expo) and a Firebase backend. Implemented features for score tracking, handicap calculation, and statistics visualization.

Budgeting App:

Full-stack web application for personal finances. Developed a responsive front-end UI with React/Bootstrap and Chart.js. Built a Node.js/Express.js back-end with a Firebase database for secure data handling.

Previous Employment

Start Mortgages *Legal executive 2019 – 2020*

Matheson *Trainee / legal executive 2015 – 2019*

Bank of Ireland *Cashier/Customer Service Agent 2014-2015*
